

ARCHITECTURAL/ THEATRICAL LIGHTING

Catalog Number

3.5C

Fixture Type:

The 3.5 CDM profile ellipsoidal spotlight produces high intensity sharp or soft edged beam. The classic design of this luminaire gives this small framing projector the character and performance that many architectural applications require. The specially designed and bright finished metal reflector maximizes light output and is specifically designed for use with ceramic discharge metal halide lamps. The instrument accepts an optional pattern holder for metal templates. The 3.5C is available as either 39, 70 or 150 watt models. Wattage designation is determined by the ballast specified. The 3.5C is fixed focus luminaire and is available in 5 different beam options.

Specifications subject to change without notice.

39, 70 or 150 WATT CDM/ CMH

3.5C ELLIPSOIDAL
