Fixture Type:

The Ground Cyc is multi-lamp, compartmented luminaire designed to provide an even wash of light on cycloramas from a ground row position. The luminaire is available in one lamp through twelve lamp configurations with single to twelve circuit wiring. Lamps are on nine inch centers. Typically, each compartment provides an asymmetrical distribution with a 50° beam angle, 70° field angle horizontally and a 65° beam angle, 83° field angle vertically.
