

SPECTRA CYC UV

The Spectra Cyc UV is a 100 Watt cyclorama/wall wash luminaire utilizing high output 365nm UV LED emitters. Designed for theatrical and architectural applications, the Spectra Cyc UV blends the output via a reflector providing smooth and even distribution. The on-board power supply allows for direct power & data input which can be daisy chained through up to 20 units. Designed for use on 6'-8' centers, individual units can be linked side by side for greater saturation of light. The Spectra Cyc UV is compatible with both DMX and RDM protocols, and comes with a library of pre-programmed fixed intensities and various intensity effects. Units can be utilized for both floor and Sky-Cyc applications.
