Fixture Type:

The venerable 360Q is a compact, rugged ellipsoidal spotlight which produces a high intensity sharp or soft-edged beam. This lightweight luminaire is outfitted with an efficient, specially faceted reflector specifically designed for the new generation of 575 watt tungsten halogen lamps. The reflector has over 700 mirror polished surfaces which optimize the optical system for greater light output and a sharper, more controlled focus. Four adjustable integral stainless steel framing shutters provide beam shaping ability and the pattern slot and holder provide the ability to project visual images. While primarily designed for theatre and studio applications, the 360Q Series is also useful in displays, show windows, churches, museums and nightclubs where precision controlled accenting is desirable.
