

# CHALICE RECESSED 100W LED DOWNLIGHT

The 100W Recessed Chalice from Altman Lighting is a LED architectural downlight designed for permanent installation and energy savings. Offering all of the benefits and longevity of an LED luminaire, changing lamps in your fixtures has now become a thing of the past.

Adding a fixture into a DMX system control system is easy with the simple three-button DMX addressing that is easily accessible from the bottom of the fixture - set it once and enjoy a smoothly integrated and energy efficient illumination solution for your area of choice.

The 100W Recessed Chalice fixture is able to be controlled by your DMX Control console & architectural control system; for facilities without a DMX control system the 100W Recessed Chalice is also available in custom, single color LEDs mains dimmable fixture. Consult factory before ordering.

# Photometrics

Photometric data taken with all channels at full, and reflects the output of the fixture with each of the lensing systems installed. Comparisons between fixtures should only be made with photometric data that incorporates the lensing system to be used. Photometric data collected using a RGBW LED fixture. Please consult Chalice 100 IES files at [www.altmanlighting.com](http://www.altmanlighting.com).

Please note that noise levels on mains dim luminaires are subject to the dimming/switching systems in which they are wired. Electrical systems displaying harmonics may increase the audible noise output from the luminaire.

**IMPORTANT!** For fixtures that are mains dim controlled, do not connect more than four (4) luminaires to the same dimmer. Connecting more than four luminaires to the same dimmer will result in undesired low-end dimmer response. Note: dimmer must be sized appropriately to handle the luminaire load.
