AFS-500 LED Followspot

The AFS-500 LED follow spot is a lightweight, 490 Watt white LED manual follow spot that is packed with a powerful feature set at an affordable price. This manually operated, compact luminaire weighs under 26 pounds (11.5 kg.) and is a purpose built multi-performance LED follow spot. The AFS-500 LED follow spot follows the traditions of Altman Lighting while introducing several new key features to this performance luminaire.

The AFS-500 LED follow spot's compact, extruded aluminum design allows for discrete luminaire placement while offering powerful light output at distances over 150 feet (45 meters). Offering a locally controlled precision zoom and lens focus system that delivers a 7° to 13° beam spread. Each AFS-500 LED follow spot includes a on-board controller, allowing for simple button press color control and fade pot control of intensity, strobe, color correction (CTO), and iris. Each of these features can be controlled from either the AFS-500 controller or via DMX.

Add the additional front-end accessory holder to house a number of after-market accessories such as an external color boomerang, top hat, or concentric rings for added beam shaping or color functionality.
